EXAMINER'S AMENDMENT

The application has been amended as follows: On page 3, line 18 of the specification the term "bema" should be changed to --beam--.

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach or make obvious modulating the pulse shape of the pulsed laser beam when the amplitude modulation gain corresponding to the minimum jitter is outside the prescribed range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morimoto (US 5898661) and Fan et al. (US 2003/0188095) teach setting a recording power according to a minimum jitter.

Nakajo (US 6643239) and Kobayashi et al. (US 6754158) teach modulation a laser pulse according to a laser power.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Haley whose telephone number is 571-272-0574. The examiner can normally be reached on M-F 8:30am-5pm.
